CAS #: 999999-99-4
- Biodegradable
- Renewable resource
- Non tested on animals

Packaging

We can package the articles in different ways:

- individually packaged
- with the client's label

Note: Standard use informations are available on demand.

LOOFAH

The loofah is a vegetable from the gourd family grown in oriental countries. Its exfoliating virtues have been known since antiquity. Nine months of sunshine are required to bring this vegetable to maturity prior to its transformation.

The best quality of loofah is found in Egypt. Once wet, its fibres become nice and soft and the exfoliating effect is very pleasant and efficient. Beauty salons and SPAS appreciate and look for these qualities.
